RE: MIAS PROGRAM PROCEDURES

As you know, all program participants fill out various applications and profiles for evaluation before being admitted to any MIAS program. Therefore, it is unlikely any participant would be disqualified from fully participating in a program after s/he had already been accepted. However, should the need arise, if a participant's behavior indicates that his further participation in the taped exercises is contra-indicated; the program conductors have the responsibility to insure that the participant ceases participation in the taped exercises.

Further, if tape schedule changes seem to be indicated by group need or response, such changes should be cleared first with either me or Bob Monroe.
